

INDIANA TREE CLIMBING COMPETITION

WORK CLIMB

The Work Climb tests the competitor's ability to move about a tree using a tree-climbing rope and harness. Competitors start in the tree and are required to visit five work stations throughout the tree to perform a specified task after which they must ring a bell. The stations include handsaw, limb toss, pole pruning, limb walk, and landing. Each of these stations simulate tasks that are performed by tree workers when working aloft.
